

Children's Gathering and Alchemical Transformation

The first "*WolfTongue*" children's *Gathering at Goldstream* took place on Sunday May 7th, 2006 with 25 children between the ages of 5 and 17 in attendance. The day started out with a steady, wet rain. As if by magic (although not to our surprise), the clouds cleared and the sun came out just as we were completing our registration. The day was absolutely beautiful! We witnessed 25 extraordinary children having their spiritual awareness validated and encouraged - many of them, for the first time in their lives. Here, were gathered children who communicate directly and clearly with animals; children who see and talk to elves, faeries and other energy beings; children who already visit with others on the "Grid"; and children who were being introduced to these ideas for the first time. Whatever their location or background, here were children acknowledging and verifying one another's experiences in a safe and sacred community setting. Here, were children coming home...

After an opening ceremony of welcome and awakening, our 3 groups headed off to begin the day's adventures:

At the animal station, Mary, Lee and Tina gave everyone the opportunity to connect with horses, llamas, donkeys, bunnies and the many other animals who hold space at the farm. We learned about reflective grooming, non-verbal communication and empowered leading while practicing being wholly present with the animals and each other.

On the Earth Spirit Walk, Teron opened the space for participants to see and communicate with Elementals in the "Faerie Dell". The Walk gave everyone the opportunity to seek out Earth Spirit formations and listen to their stories, as well as time to explore teachings about Animal Spirit wisdom and lore. Along the way, we stopped at the sound station to explore voices, vibration and energy.

Peter gave all 3 groups the opportunity to visit the "Grid", where children gather to communicate telepathically, radiate loving light to the planet and of course – play! Here, we were able to connect with the children of the "Grid" to begin co-creation of a new school system and educational paradigm, which will meet the needs of ALL of the gifted children among us.

For the workshop facilitators, witnessing the journeys of these children from beginning the day in uncertainty and separation to completing it in confidence and connectivity was the most inspiring and heart warming aspect of the gathering. Laughter and gratitude were with us in abundance as children and parents lingered for hours following our closing ceremony.

These personal transformations are a profound and powerful demonstration of the many Alchemical Transformations currently taking place at *Goldstream Eco Resort and Sanctuary*.

Alchemy is a scientific process of transmutation and transformation that draws on the numerical magic of 3's. Alchemists of old refer to humanity as the "Living Dead". By this they mean that the majority of human beings subsist in their mundane lives, completely unaware of their higher consciousness or divine purpose. Until a being, energy or substance awakens to awareness of it's higher purpose, transformation cannot begin. However once awakened, all living beings who so desire are capable of actualizing the embodiment of their highest potential or most refined state of being. This Alchemical Transformation is commonly illustrated in discussion of the transmutation of base (un awakened) metals into their full potential - Gold.

The first Alchemical trinity or "3", consists of the Alchemist, the Holy Spirit and the Substance wishing to be transformed. This substance can be base metal, land, plant, person or any other energy form that desires transformation. The Alchemist sets the intention, Spirit provides the energy and the Substance travels the path of transformation. The first step in this process is the awakening of the substance.

Directly in the centre of the Goldstream property is a tree, which clearly functions as the anchoring point or centre point of the *Eco Resort's* energetic mandala. When we first encountered this tall, straight, silvered tree it was, for all outward appearances – completely dead. We later found out that it has in fact, shown no signs of life for the last 10 years. A perfect candidate for Alchemical Transformation, it followed naturally to engage this tree as a symbol of transformation of the entire property.

We immediately began holding meditations and prayers at the base of this great being. Energetic clearing of the tree was implemented through the Violet Flame transmutation process, Divine Grace on the Ruby ray and etheric activation of the most powerful life force available to us – Alchemical Gold.

Within a few short weeks, the tree began to sprout leaves and is now proudly displaying an abundance of new foliage!

In the course of this process, many people picked up on the presence of some kind of petrol-based substance in the ground in this central area. Recently, a backhoe was brought in to gently maneuver the earth around the base of the tree uncovering a plethora of plastics, rubber, fabrics, metals, and other refuse material. A work party was arranged and these materials have now been cleared from this sacred space.

As our beloved tree continues it's magical transformation, the animals of the property have begun to visit it daily, often accompanied by their wilder, roaming friends. At the base of the tree, our sacred gardener Dee, is already manifesting our intention to create a living Medicine Wheel and Mandala garden arranged in

the sacred geometric pattern of the human angel "808". As this area of the land continues to transmute and transform at both the etheric and physical levels, so the entire property begins to resonate with this new energetic frequency. This symbolic "Tree of Life" is already broadcasting its energy out over the entire property creating a force field of energy or "City of Light". The children know and recognize that this is a sacred place that will continue to grow and evolve as these energies build.

Welcome Home!
